Avoid Wrong Hire / Business

When an employer hire the wrong person, you'll likely find yourself looking for ways to reassign the employee or working tirelessly to fit him or her into the company in some way. Rather than simply letting the employee go, you will owe it to them to spend time and money on training and ongoing performance review. Eventually, he or she may become an adequate employee for your company, but there is also a chance that he or she will not work out.
